**A 'Keep it Clean' Guide
How to Care for your Car!**

TOP TIP

Your indispensable
guide to car care, with
some fabulous
top tips!

CarPlan - No 1 in Car Care

CarPlan

WASHING:

TOP TIP

If you clean your car wheels infrequently, perhaps once a month or less, then **Wonder Wheels** is the product to use to recreate a showroom finish.

If your alloy wheels have baked on dirt, spots, have become discoloured and are difficult to wash - we have a quick solution!

Use award winning **Wonder Wheels**, a unique liquid and brush that will safely clean wheels with the most stubborn baked on dirt, bringing them back to an almost showroom condition.

START WITH THE WHEELS

TOP TIP

Car cleaning starts with the wheels. Use a soft brush and wear protective gloves. The soft brush will be useful for particularly baked on areas. Before cleaning, wash wheels thoroughly to remove any loose dirt build up.

New

Wonder Wheels 'U' is specially designed for use on chrome, polished alloy or damaged wheels.

CarPlan

The high quality of CarPlan products has been confirmed in many tests!

GET THAT GREAT CAR BODY WASH

Wash your car thoroughly with Triplewax shampoo to increase the time between cleaning and making it easier to wash next time!

TOP TIP

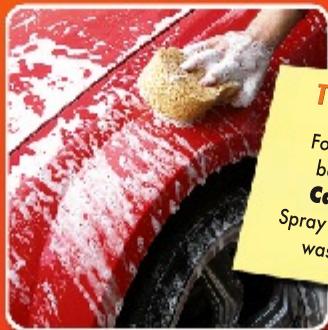

Avoid using household cleaning agents as they contain strong detergents that damage paintwork. Avoid very cheap shampoos as they often contain many of the chemicals found in household detergents.

TOP TIP

Before washing, first rinse the car with water to remove loose dirt.

The most popular waxing shampoo in the CarPlan range is **Triplewax Car Shampoo**. It provides a great shine and protection.

TOP TIP

For soaking and removing baked bug residues use **CarPlan Bug Blitz**. Spray insects 5 minutes before washing with shampoo.

When buying CarPlan products you are guaranteed quality!

CarPlan

GET THAT GREAT CAR BODY WASH

TOP TIP

Regular use of a waxing shampoo is not enough to provide complete protection against harsh weather conditions. The car paintwork should be waxed with traditional wax at least twice a year.

Blue **Triplewax Wash & Wax Shampoo** contains gloss enhancing properties. It is ideal for demanding drivers who appreciate excellent protection and a deep shine.

TOP TIP

When using CarPlan shampoos, always use the exact dosage directions on the label. Want a superb finish? Giving your car a quick, second shampooing will clean any areas missed first time around!

The green **Triplewax Heavy Duty Shampoo** is a real dirt eliminator. It easily removes heavy dirt, salt spots after winter, and dead insect residues in summer.

It is safe to use on paintwork, rubber and plastic trims.

GET A DEMONIC SHINE IN SECONDS

*No time for traditional waxing
but still want to create
a fabulous gloss finish?
Use Demon Shine!*

No need to dry your car after washing,
simply dilute 3 full caps of **Demon Shine** to 10 litres of
water and pour over the car's exterior, starting from the
roof. Then stand back and admire the demonic shine!

TOP TIP

If you have a pressure
washer with a feeder,
simply fill with three caps of
Demon Shine.
Now cleaning will take
mere seconds.

TOP TIP

Want to create that fabulous
gloss finish every time?
Simply use **Demon Shine**
after each wash.
It is so easy!

If your car is already
washed, clean and dry, then
simply spray on new
Demon Instant Shine
and wipe away for that ultimate finish.

CarPlan, proven in quality car care!

CarPlan

RESTORING PAINTWORK ON NEW CARS

Has your car's paintwork already lost its showroom shine? Is it covered by light scratches? Surly it's time to refresh it!

Premium Wax

is a unique, gentle polishing wax specially developed for use on new paintworks, from 0 to 2 years*. Removes light door scuffs and micro scratches, whilst providing protection to paintwork. Ideal for use on pearl and metallic paintworks.

TOP TIP

Both products help restore paintwork to a high quality finish when they are gently applied to paintwork in a circular motion.

TOP TIP

When choosing a colour from the T-Cut range, remember that each colour pigment works with all shades of the colour. You do not have to match them exactly.

T-Cut Color Fast is recommended for use on car paintworks aged 2 to 6 years*. This product removes slightly bigger micro scratches than Premium Wax. The addition of colour pigments enhances colour depth and helps to mask more obvious paintwork imperfections.

*Depends on paintwork type and frequency of care.

Available in 8 colours

CarPlan

We have produced car care products for over 50 years!

RESTORING OLDER PAINTWORKS

*Is your car paintwork dull,
scratched and blemished?
Here you need a traditional,
strong restorer.*

If your car paintwork looks like it needs a new lease of life, then try CarPlan's excellent **Color Restorer**, suitable for use on traditional and metallic paintworks. To be applied with a damp cloth and rubbed into paintwork in a circular motion, and then polished with Triplewax car wax.

This restoration treatment radically improves the look of older paintworks by cleaning, removing scratches, blemishes, scuffs, tar and resin spots.

TOP TIP

CarPlan Color Restorer can also be used on new paintwork in order to diminish more visible scratches and scuffs.

TOP TIP

Color Restorer should be applied to car paintwork in sections, in order to restore each area thoroughly. Restoration of the whole car body can be split over several days as each area you treat should be no bigger than 30cm x 30cm.

We are a professional in car care products!

CarPlan

REMOVING MORE VISIBLE IMPERFECTIONS

*Can you see more obvious scratches across your car's paintwork?
If so, use CarPlan restorer or scratch removing paste!*

CarPlan has two fabulous scratch removing pastes!

One of which is **T-Cut Scratch Remover**, which consists of a mix of paste and polishing agents.

TOP TIP

To polish effectively, restoring to a high quality finish, use a **Triplewax Polishing Cloth**.

TOP TIP

Remember, CarPlan only provides uniquely branded, innovative products tested to the highest quality!

with **nano technology**

Patent Pending

T-Cut Color

Fast Scratch Remover

contains a patent pending formula that consists of a combination of scratch removing pastes and colour pigments.

The use of nanotechnology increases its efficiency and the quality of the end result.

Available
in 6 colours

CarPlan

The high quality of CarPlan products has been confirmed in many tests!

WAXING FOR HIGH SHINE

The paintwork is in great condition and regularly treated? Then only use the best, tested car waxes available!

TOP TIP

Remember, thorough waxing takes a couple hours. Start as ever, by thoroughly washing your car. Rinse well before applying **Triplewax Car Polish** on either wet or dry paintwork.

CarPlan car waxes effectively protect car paintworks, allowing them to remain in a fantastic condition for longer.

Triplewax car polish

is available in both traditional and metallic formulations.

TOP TIP

Apply wax sparingly and work out into paintwork. Applying a thick layer will not improve the quality of the finish, and will take longer to dry and increase the time it takes to polish.

Auto Finish

is an advanced car wax that provides a superb, long lasting, polished shine.

TOP TIP

To avoid discolouring plastic and rubber black trims, protect them before waxing with **Original Black**.

To seal the high gloss finish for several months, apply a special sealing layer of **Demon Seal and Shine** 24hours after waxing.

CarPlan, proven in top quality car care!

CarPlan

EXTERIOR VALETING

TOP TIP

If you happen to discolour black plastic and rubber trim during waxing, use **Black Trim Wax** now to restore the black appearance.

Has your car's exterior plastic trim lost its depth in colour? Then it's time to take professional care of it!

The damaging effects of weathering and harsh road conditions are visible after winter. Bumper and door trims become faded by strong road defrosting agents and salts, as well as UV rays from direct sunlight.

The solution is **Black Trim Wax**. This unique polymer formula effectively restores faded and blemished exterior trims to their naturally black and glossy state.

If you wish to achieve a colourless shine, then use the colourless aerosol product, **Original Black**.

TOP TIP

For cleaning small and thin elements, use a product soaked cloth. Don't forget to wear protective gloves.

CarPlan

We have produced car care products for over 50 years!

INTERIOR VALETING

Do you enjoy a fresh and clean fragrance inside the car? What with spending so much time in there, who doesn't!

Flash Dash

contains a winning formulation that cleans and protects interior surfaces, whilst providing a long lasting shine.

TOP TIP

Before starting interior cleaning, vacuum seats, carpets and even plastic elements.

As crazy as this sounds, rub a clean paintbrush through your hair to charge it with a mild static, in order to effectively remove dust from vents and other harder to reach dashboard areas.

If you wish to clean without shining, use **Demon Green**.

Not only cleaning dirt and grime from plastic elements, it can also be used to clean windows, windscreens and paintwork of stubborn insect and bird lime, whilst leaving a pleasant fragrance.

Use Leather Valet

to clean leather upholstery. It is an excellent cream that moisturises and nourishes the leather.

TOP TIP

For leather upholstery cleaning you can also use CarPlan's unique **Leather Valet Wipes**.

Looking for the best products? Ask for CarPlan!

INTERIOR VALETING

*Decided to refresh and revamp car upholstery?
Then look no further!*

Use **Interior Valet** to clean dirt from upholstery. For stubborn stains, use **Stain Valet**.

Rub it in to upholstery with the attached brush applicator. Scrape away the dirty foam with the edge of the applicator and wash in warm water, then repeat this cleaning process. Finally, wipe down upholstery with a clean, damp cloth and leave to dry.

TOP TIP

Open all doors in order to provide good ventilation to help upholstery dry quicker.

TOP TIP

The cleaning of heavily soiled air conditioning units is often problematic and expensive. To avoid any difficulties, simply use

Kleen Air once or twice a year.

*The car interior is clean
but there is still an unpleasant
smell coming
from the air
conditioning
system?*

Using **Kleen Air** means that you can refresh your air conditioning system in 10 minutes. The whole cleaning process runs effectively without the use of additional tools or removal of dashboard parts.

CarPlan

The CarPlan brand prides itself on innovation!

TYRE SLIK IS LIKE THE ICING ON THE CAKE

KEEP A CAN HANDY AND APPLY WEEKLY!

TOP TIP

Tyre Slik can be sprayed into the lid and then applied on tyres with a brush. This kind of application is very effective, especially in windy weather.

*Car tyres are no longer black?
They remain faded,
even after thorough cleaning?
Time to use CarPlan Tyre Slik!*

Nothing can spoil the look of a washed and waxed car like grey, matt and dirty tyres.

Tyre Slik

is the winner of numerous, accredited tests, superb for shining and protecting tyre walls. It creates a long lasting, glossy 'wet look' on tyres and protects them against fading and ageing.

TOP TIP

Tyre Slik is a great product for protecting both winter and summer tyres during seasonal storage.

Shine your tyres at the end of all other car care treatments in order to create that perfect finish.
